Chief, Operations and Training Division

50X1

RS-13 Equipment Requirement for ☐ Agent Training

50X1

1. The training of two ☐ agents, scheduled to be equipped with RS-13 type equipment, was started as of 18 July 1955. Present planning indicates that their operation will be mounted in the Spring of 1956.

50X1

2. Since ☐ agent training requires instruction in the use and operation of the radio equipment to be used operationally, a requirement for RS-13 equipment exists in this division.

50X1

3. For training purposes, two complete RS-13 units will be required. In addition, for purposes of reduced-distance contacts and adequate explanation of the theory of high speed transmissions, one of the special receivers required for Base Station reception and redubbing of RS-13 type transmissions is required for the training program.

4. The training program, as presently scheduled, will require the equipment by 1 October 1955.

5. It is requested that your representative contact Mr. ☐ and ☐ arrange the transfer of the equipment.
